

Why Plesk Business & Collaboration Edition?

Plesk Business & Collaboration Edition is the perfect all-in-one Business & Collaboration Suite to provide start-ups and small to medium sized businesses with a secure turnkey solution that provides business owners with all you need to run your business: **Business class Email and collaboration**, website building and maintenance, SEO optimization, back-up and most importantly rock-solid server to site security. Plesk Business & Collaboration Edition is freeing up administrator time and offers complete lifecycle management for websites and business applications from one intuitive interface on any type of infrastructure.

Plesk Business & Collaboration Edition is a ready-to-go solution based on the **best practices** like pre-configured mail server, web application firewall and IP address banning. On top the **Business Server** includes our best extensions handpicked for security, website speed and productivity. **Managed (MSP) or cloud service providers (CSP)**, and all other hosting partners receive a scripted toolset we call our cookbook. This toolset helps you to automate setup of the offerings, accelerate time-to-market and increase margin. **Plesk enables MSPs, CSPs and hosting providers alike** to stand out from the competition and increase revenue by adding Plesk Business & Collaboration Edition as an extra layer on top of the infrastructure and turn a generic hosting plan into a well targeted **business & collaboration suite**.

The ideal customer

- **Agencies and start-ups** who want to invest in productivity rather than operations when they set up and manage a secure Mail and Web server
- **SMBs** who need an **intuitive point-and-click web interface** to manage and **secure critical business essentials** such as **private email, calendars, contacts, tasks and file storage** for their employees
- **Start-Ups and SMBs** who are taking server and website security seriously but don't have security experts on staff
- **Any business** seeking for a cost efficient yet **professional business class Email and collaboration solution** whilst keeping full control over their mail server environment
- **Any IT Administrator** who wants to **free-up administration time** to focus on innovation rather than administration

At the heart of every organization is email & collaboration. **Plesk Premium Email – Powered by Kolab** gives you control of this most essential and vital business data in an professional, flexible, secure and scalable system.

What is pre-installed?

- **Plesk Premium Mail** powered by Kolab - Secure business class Email and collaboration suite with integrated calendars, task, files, notes and contacts for up to 10 users.
- **Smart Updates for 30 WordPress Websites** - Our Deep learning algorithm analyzes your WordPress updates and performs them without breaking your site or notifies you that the update might be dangerous.
- **SEO Toolkit Personal Edition** - Design and execute your SEO strategy, monitor your keyword rankings, and benchmark yourself against your competitors - all in one place.
- **Acronis Server Backup** - Full image-based backups to the secured Acronis Cloud with granular, self-service recovery and 100GB of space.
- **Backup to Cloud Pro** - Easily schedule Automatic Backups to the most popular Cloud Storages.
- **Kaspersky Antivirus for Servers** - Protect your mails from malicious and potentially dangerous code with the all in one solution from one of the leading providers of Antivirus softwares.
- **Revisium Antivirus for Websites** - Intelligent malware detection tool with one-click automatic malware cleanup and domains blacklist status monitoring.
- **Uptime Robot** - Track the downtimes of your websites and your servers with uptime robot.
- **Google PageSpeed Insights** - Identify possibilities to speed up your website and accelerate sales conversion.
